RAPID CONSTRUCTION DELIVERED ANYWHERE

Remote & Resource Sector Overview

Stack Modular was built to manufacture and deliver quality construction projects quickly across the world. Our end-to-end manufacturing process allows us to deliver rapid construction solutions for remote and resource sector projects. From specialty award winning arctic hotels to one of Canada's largest remote workforce camps, our team, experience, and process can be counted on to deliver critical infrastructure when needed. Remote and Resource Projects require a

custom approach to achieve success. The challenges of site access, availability of skilled labor and resources, and the complexity of the building environment require new and innovative solutions. Stack Modular provides the construction solutions needed to deliver in challenging environments. With a turn-key construction process, we simplify complex builds and turn ideas into beautiful installations across the world.

BUILT FOR MODULAR

**We build anywhere.
From remote locations,
challenging conditions,
and complex
environments, our
turn-key construction
process allows us to
transform ideas into
beautiful structures.**

Solving the Problems of Construction

01

REMOTE ACCESS

We turn every location into a possibility. With our ability to build off site, we transform what can be done and where. This allows us to build across the world with confidence.

02

CHALLENGING CONDITIONS

We minimize the activity on site by simplifying the construction process. This allows us to avoid the time building in challenging conditions, from weather, wind and water.

03

LIMITED RESOURCES

With off-site construction we eliminate the pressure on skilled labor and materials. We reduce the risk and impact on schedules by providing a safe and secure environment to build.

04

SITE ACCESSIBILITY

We reduce the impact on site by limiting the activity over the duration of the project through modular solutions. This eliminates waste, congestion, noise, and disruption.

OUR OPERATIONS

Built to Deliver Across the World

With over 750,000 sqft of manufacturing space and 500+ production personnel, we are structured to deliver modular solutions across the world. As a design-assist firm, we control every aspect of the build to deliver quality at scale. We provide one team and one commitment.

We can take a simple idea and transform it into a cost-effective solution. We are true construction partners that build with transparency and communication. From initial design and planning to final installation, we are a true end-to-end construction provider. Our partnership with Bird allows us to leverage 100+ years of construction experience with a global workforce of over 5,000+ staff. We are built to deliver on a challenge.

Proven Experience and Scale Delivered Sustainably

We have the team, experience, manufacturing capabilities, and scale to deliver rapid remote and resource sector solutions across Canada. Through modular construction, we deliver sustainable solutions for a sector that needs quality and quantity. We were built to be a remote and resource sector partner.

Delivering Solutions Across the World

THE RIGHT TEAM

Our Trusted Partners

We have the right team and resources to deliver innovative solutions across Canada. We partner with industry leaders to deliver buildings with impact. One Team, One Build, True Accountability.

OUR TRUSTED PARTNERS

OUR CERTIFICATIONS

National Building Code of Canada

A Global Supply Chain with Scale and Service to Deliver

Our manufacturing and supply chain process allow us to deliver construction solutions across the world. With 3 production facilities, hundreds of staff, and logistics professionals to support projects on each critical step, we are a true turn-key provider. With over 12+ years of delivering on challenging and remote projects, we understand what it takes to deliver.

Delivering Solutions Across the World

We have the ability and experience to deliver projects across the world, in the coldest, warmest, and most remote locations. We understand what it takes to deliver a project from initial conception to completion.

INDUSTRY EXCELLENCE

With over 100+ years of construction excellence, you can count on our team to take pride in delivering your next project.

WHAT WE BRING

Trusted Experience and Proven Scale

We have delivered hundreds of modules and completed challenging projects across the world. For the last 12 years we have invested in our people, process, and procedures to create an organization that delivers.

Remote projects are complex. Every detail needs to be planned and communicated. Each step needs to be measured and calculated. We bring the experience and scale to every challenge so that each project is successful. Trust Stack Modular for your next remote build for a true end-to-end manufacturing partner can bring value.

HOW WE WORK

Our Process

Our design assist and modular delivery model allows our team to deliver sustainable solutions quickly and at scale across Canada. We transform an idea and vision into reality. Our modular manufacturing process simplifies construction and reduces risk, schedule, and complexity.

Our Approach to Remote Projects

We plan first and build second. Every detail is scheduled and coordinated to reduce the risk and building timeline. We build with transparency and communication by owning the outcome. We are one team focused on delivering one result. We build through a turn-key model where all stakeholders are aligned and build in collaboration.

A True Building Partner

Our Team

We build as one team accountable for the delivery of a solution that drives impact. With over 100+ years of experience, 5,000+ employees and 750,000 sqft of manufacturing space, we have the scale and specialization to deliver. Our partnerships and relationships position us to build rapid solutions unmatched in the industry.

Our Process

We start from an idea and build a solution that achieves results. Our design assist and turn-key manufacturing process ensures accountability from the beginning through to project end. We use technology to provide visibility on each step of the process and leverage this transparency to deliver.

Our Commitment

We know what is at stake. Our team is committed to delivering construction solutions that help solve the challenges facing remote locations and the resource sector.. Our brand promise can be counted on to deliver. We were built for this.

OUR PROJECTS

Quality Projects in Remote Locations

LNG Canada: Workforce Accommodation

Stack Modular built a remote workforce camp to house 4,500+ in northern British Columbia. With single rooms, private showers and washrooms, this was a state of the art facility that transformed over 130+ modules into critical infrastructure.

Aqsarniit Hotel and Conference Centre

This award-winning turn-key modular solution was built and installed in one of the coldest and most remote places in the world. It now provides 94 rooms of housing and 5,000 sqft of conference space and amenities.

OUR BEST BUILD YET

The Stack Advantage

We were built for this. Our team and process is established to deliver rapid construction solutions at scale. With over 750,000 sqft of manufacturing capacity, 5,000+ employees, over 100 years of traditional construction experience, and 13 years of modular history, we are built to deliver.

Our technology, team, and process lead the industry and are counted on to deliver complex and critical projects all across the world. The Stack Advantage is the unique collaboration of the traditional and modular construction methods, backed by experience, technology, and scale.

Through the material we use, the team we employ and the process we have defined, Stack Modular is the construction partner you need to deliver rapid quality at scale.

Watch

We are built to deliver remote and resource projects. As an organization, we have created our infrastructure and expertise to simplify construction and be solutions focused for our partners.

As an organization we have the ability to start from an idea and transform a concept into a built reality. We love to partner at the beginning and bring our experience and expertise to work for our partners. If there are projects that need to be built and challenges that need to be solved, we would love to begin a conversation and see where we can bring the Stack Advantage to work. We are personable, professional, and ready to get to work on your next project. Please feel free to reach out to start the conversation.
